# #1 WAITING TO CALL A LAWYER

*A big mistake many people make is that they wait way too long to talk to a lawyer. Your first consultation is free. It can only help you to have a lawyer look over your case with you. Don't wait until it's too late to do anything. Call right away.*

## #2 ***LOSING EVIDENCE***

*After most personal injury accidents, there is going to be a lot of evidence that you need to collect. You collect evidence by taking pictures and videos. You can also get contact information from witnesses. An attorney can also help you gather security camera footage, if that will help you with your claim.*

# **#3 AVOIDING MEDICAL CARE**

***You need treatment for your injuries! We understand that life gets in the way of taking care of yourself, but you have to prioritize getting care. Go see a doctor. Go to the ER. Do what you need to do to get better. Don't wait. Waiting hurts your health and your claim.***

## **#4 IGNORING DOCTOR'S ADVICE**

*Doctors have a job of helping people feel better. You want to make sure you are taking all of their advice. Your well-being and the success of your case depends on this.*

**(662) 301-7909**

# **#5 GIVING STATEMENTS TO INSURANCE REPS**

*Do not talk to the insurance company about your claim. They will ask for a statement. It will not help you to give them one. They are asking to talk to you because they want to trip you up and get you to say something that makes it so they can throw out your claim.*

**(662) 301-7909**

## **#6 GETTING ADVICE FROM FRIENDS**

*Your friends and family mean well. They want you to do well, but they are likely not personal injury trial lawyers. They don't know how to best advise you on your legal matters. Go to your lawyer for legal advice.*

**(662) 301-7909**

# #7 ***HIRING THE WRONG LAWYER***

*Who you hire for your personal injury case matters. Don't pick someone just because you've seen their name all over advertisements. Pick someone you feel can handle your case well. Hire the lawyer who will fight for your justice.*
